Index Description. EDOGX is a portfolio of up to fifty stocks derived from the S-Network Emerging Markets Index (SNEMX). The EDOGX methodology selects the five stocks in each of the ten GICS sectors that make up the SNEMX which offer the highest dividend yields as of the last trading day of November. The stocks selected for inclusion in the portfolio are equally weighted. EDOGX divides into the following ten GICS sectors: consumer discretionary, consumer staples, energy, financials, health care, industrials, information technology, materials, telecommunication services and utilities.

Inclusion Criteria. The selection criteria for the SNEMX include requirements for sector inclusion, country qualifications, primary exchange listing, minimum market capitalization, minimum average daily trading volume, share price and other factors. All constituents of EDOGX must be constituents of the SNEMX. Individual securities to be included in EDOGX are selected based on a ranking system within each sector that selects the five stocks in each sector with the highest dividend yield as of the last trading day of November. Dividend yield is computed based on the regular cash dividends paid by the company over the previous twelve month period, divided by the share price.

Weighting Methodology. All stocks selected for inclusion in EDOGX are equally weighted. Share weights are based on prices as of the close of trading on the second Friday of the rebalancing month. If there are less than 5 eligible securities represented in any GICS sector as of the snapshot date the index will include only those securities which qualify. All constituents are equally weighted as of the record date.

Rebalancings. EDOGX is rebalanced quarterly, at the close of trading on the third Friday of the last month of each calendar quarter.

Index Data. Index values are disseminated in US dollars via the Chicago Mercantile Exchange on both a price only and total return basis. Values for the price only index (EDOGX) are distributed throughout the day at fifteen-second intervals. Values for the total return index (EDOGXTR) are distributed once daily following the close of trading on US stock markets on each trading day. Daily values are available from December 31, 1999.
